

Maze Code

```
when green flag clicked
  forever loop
    if distance to mouse-pointer > 5 then
      point towards mouse-pointer
      move 2 steps

when green flag clicked
  go to x [ ] y [ ]
  forever loop
    if touching color black then
      go to x [ ] y [ ]

when green flag clicked
  forever loop
    if touching color green then
      say You won! for 2 seconds
```

The code consists of three separate scripts. The first script starts with a 'when green flag clicked' event, followed by a 'forever' loop containing an 'if' condition: 'distance to mouse-pointer > 5'. If true, it executes 'point towards mouse-pointer' and 'move 2 steps'. The second script starts with 'when green flag clicked', followed by 'go to x [] y []', and a 'forever' loop with an 'if' condition: 'touching color black'. If true, it executes 'go to x [] y []'. The third script starts with 'when green flag clicked', followed by a 'forever' loop with an 'if' condition: 'touching color green'. If true, it executes 'say You won! for 2 seconds'.
